

APEX FAST FIT COMBI PACK

FEWER BENDS FEWER JOINS

APPLICATION:

- A valve kit with all components required for the installation of a mains pressure Hot Water Cylinder. The CP 20FF has been designed with speed of installation in mind. Installation requires fewer bends and fewer joints than a standard valve train installation.

FEATURES & BENEFITS:

- Only one bend to complete the valve train installation
- Integrated Check Valve in the EVT – removes the need to create an extra connection for faster installation
- New Tee Ball Valve – provide optional faster cylinder drainage point
- Cylinder hugging installation means all valves remain inside the tray dimensions
- Compliments the Apex Dry Wall Kit perfectly

CONTENTS:

- | | |
|--------------------------------|-------------------|
